THE WOMEN'S

The women's opposition parties have a significant role to play in shaping the political landscape. Their platforms often focus on issues such as gender equality, social justice, and democratic reforms. The women's opposition parties are particularly influential in countries where traditional political parties have been dominated by men. By providing a platform for women's voices, these parties help to create a more inclusive and representative political system. Their influence is further enhanced by their ability to mobilize grassroots support and engage a wide range of women in the political process. The women's opposition parties are a crucial component of the democratic process, playing a vital role in ensuring that the voices of women are heard and their rights are protected.
The History of E-mail and Communication

The history of e-mail and communication has been marked by a number of significant developments. In the early days of the internet, e-mail was a relatively new form of communication. However, it quickly gained popularity due to its convenience and speed.

In the late 1970s and early 1980s, e-mail was primarily used for personal communication. However, as the internet grew in popularity, e-mail became a primary means of business communication. Today, e-mail is used for a wide range of purposes, including personal communication, business communication, and marketing.

The history of e-mail and communication has been shaped by a number of technological advancements. The development of the internet and the World Wide Web has made it easier than ever to communicate with others. In addition, the development of mobile devices has made it possible to communicate on the go.

Despite these advancements, e-mail and communication continue to evolve. As new technologies emerge, it is likely that e-mail and communication will continue to change and develop.
ACCEPTANCES AND REJECTIONS

The manuscript was received in good order on February 25, 1968, and was assigned to the section editor for consideration. The following items were submitted:
