THE CHANGING INNOVATION LANDSCAPE: CHALLENGES FOR COLLABORATIVE DESIGN

ICED17

CHAIRS: IAN WHITFIELD AND AVRIL THOMSON

Monday 21st August 2017 – 9:30 to 12:30 - Room 2314

Workshop Team

Ian Whitfield

Avril Thomson

Ross Brisco

Collaborative Design SIG

To support and build the community of collaborative design researchers and initiate a collaborative design research agenda.

Substantial benefits can be achieved (from better supporting collaborative design):

- Efficiency improvements
- Elimination of rework
- Improved complexity management
- Automation of parts of the collaborative design process

What are the challenges of collaborative design?

Current collaborative design research provides incremental, disciplinary improvements, and has not been holistically investigated to generate the breakthrough required.

Format

9:30	Introduction	Collaborative Design SIG
9:40	Workshop Context	Overview of the changing innovation landscape
10:05	Solar Eclipse	Solar eclipse break/coffee
10:35	Group Discussion	What are the challenges in harnessing the changing innovation landscape to achieve maximum benefit for collaborative design?
11:10	Activity	Theming the challenges.
11:40	Open Discussion	How can we address these challenges through research?
12:14	Close	

What is the changing innovation landscape?

Organisations have an increased importance to adapt and advance collaboration practices in design in order to survive and flourish.

What is the changing innovation landscape?

Technological advancements have the potential and an expectation to enabled agile collaboration and new possibilities for innovation.

What is the changing innovation landscape?

The characteristics present complex and contradictory challenges to conventional industrial practice and confounds the benefits gained from wide-spread implementation.

Characteristics of the changing innovation landscape

- Rapid creation and articulation of viewpoints
- Faster construction of networks
- Democratisation of the product or service development process
- Discontinuous and open innovation
- Creating new business models and markets
- Adoption of dynamic capabilities to sustain competitive advantage

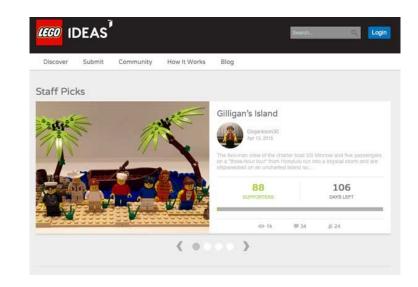

What the changing innovation landscape could mean?

- Some industrial practices may be ill equipped to replicate these benefits in a collaborative environment:
- Collaborative endeavours fail due to obstacles in sharing knowledge
- Difficulty in coordinating stakeholders

Characteristics of the changing innovation landscape

- Rapid creation and articulation of viewpoints
- Faster construction of networks
- Democratisation of the product or service development process
- Discontinuous and open innovation
- Adoption of dynamic capabilities to sustain competitive advantage

How might we approach this problem?

Equip the next generation of engineers with a skillset to address the challenges and complex contradictions presented by the innovation landscape

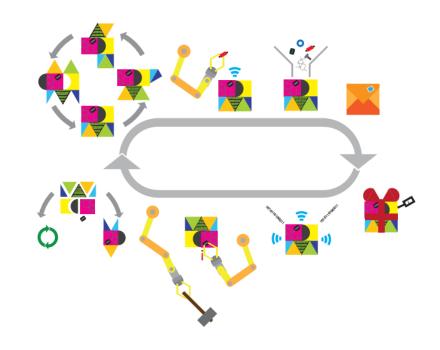

Industry 4.0

Enables agile systems connectivity and communication.

But, to fully realise industry 4.0 we must investigate how our design activities fit?

Distributed manufacturing

Potential to facilitate the rollout of distributed manufacturing.

How do we ensure quality control with a wide and fast rollout.

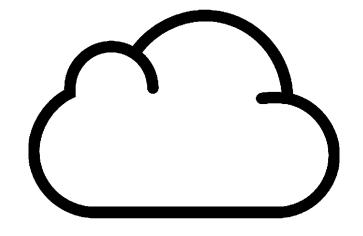

Knowledge capture and dissemination

With a greater reliance on technology our systems must support connectedness and access to information.

Eclipse Break

Brief Introductions

- Name
- Affiliation
- Background

Please keep to maximum 30 seconds.

Open Discussion

How can we harness the changing innovation to achieve maximum benefit for collaborative design?

Group Discussion

What are the challenges towards achieving a new innovation landscape?

- 1. Discuss in your group(s) 10 minutes.
 - 2. List your challenges 10 minutes.
- 3. Prioritise three most important challenges to share with the group 10 minutes.

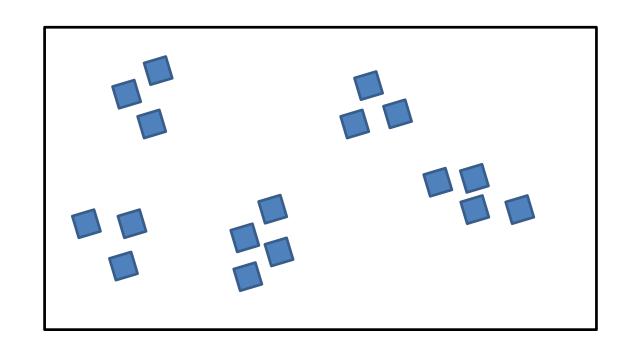

Theme the challenges

Select a challenge and add it to the wall.

If you have anything which relates to this challenge add it alongside.

Open Discussion

How can we address these challenges through research?

Concluding remarks

COLLABORATIVE DESIGN EDUCATION

CHAIRS: ROSS BRISCO & BRYAN HOWELL

Today at 2pm - Room 2314

Thanks for Coming
